

# 2025 Efficient Homes Heating & Cooling Rebate Guide

MEASURE	REBATE AMOUNT
<p><b>Central Air-Source Heat Pump</b> Furnace/AHU must be equipped with ECM blower. Tier 1: Efficient ASHP. Minimum 14.3 SEER2 (15.0 SEER) and 7.1 HSPF2 (8.5 HSPF). Specific combination of indoor and outdoor models installed must be listed on <a href="http://AHRIdirectory.org">AHRIdirectory.org</a>. Any exceptions require pre-approval. Tier 2: Efficient Cold-Climate ASHP. Specific combination of indoor and outdoor models installed must be listed on <a href="http://ashp.neep.org">ashp.neep.org</a>.</p>	<p><b>Tier 1: \$1,000</b> <b>Tier 2: \$2,000</b></p>
<p><b>Mini/Multi-Split Air-Source Heat Pump</b> Tier 1: Efficient ASHP. Minimum 16.0 SEER2 (17.0 SEER) and 7.8 HSPF2 (9.0 HSPF). Specific combination of indoor and outdoor models installed must be listed on <a href="http://AHRIdirectory.org">AHRIdirectory.org</a>. Any exceptions require pre-approval. Tier 2: Efficient Cold-Climate ASHP. Specific combination of indoor and outdoor models installed must be listed on <a href="http://ashp.neep.org">ashp.neep.org</a>.</p>	<p><b>Tier 1: \$900</b> <b>Tier 2: \$1,900</b> <b>Indoor Unit: \$100</b></p>
<p><b>Air-to-Water Heat Pump</b> COP of <math>\geq 1.7</math> at an outdoor air temperature of 5°F and an output water temperature of 110°F.</p>	<p><b>\$2,000</b></p>
<p><b>Ground-Source Heat Pump</b> Furnace/AHU must be equipped with ECM blower. Closed-loop systems: Minimum EER 17.0. Open-loop systems: Minimum EER 19.0. Includes Well-Connect, replacement ground-source heat pump or new ground-source heat pump. Specific combination of indoor and outdoor models installed must be listed on <a href="http://AHRIdirectory.org">AHRIdirectory.org</a>. Any exceptions require pre-approval.</p>	<p><b>\$2,000</b></p>
<p><b>Ground Loop for Heat Pump</b> New/replacement ground loop installed with eligible ground-source heat pump. Limit 1.</p>	<p><b>\$3,500</b></p>
<p><b>Desuperheater for Ground-Source Heat Pump</b> Must be connected to ground-source heat pump with desuperheater for domestic hot water generation. Must be connected to electric back-up water heater.</p>	<p><b>\$500</b></p>
<p><b>Complete System Bonus</b> Install a new Central Air-Source Heat Pump or Ground-Source Heat Pump AND a furnace or air handler with ECM blower at the same time. Central ASHP or GSHP must qualify for an equipment rebate to be eligible for the bonus. Limit 1 Bonus per system.</p>	<p><b>\$200</b></p>

MEASURE	REBATE AMOUNT
<b>Wi-Fi Enabled Thermostat</b> Must control electric heating and/or cooling. Limit 1 per electric baseboard, central A/C or central heat pump, or mini-split outdoor unit.	\$75
<b>Heat Pump (Hybrid Electric) Water Heater</b> Minimum 2.2 UEF.	≤50 gallons: \$700 >50 gallons: \$1,200
<b>Electric Resistance Water Heater</b> Whole-home electric tank or point-of-use electric tank. Tankless water heaters are not eligible.	\$100
<b>Energy Recovery Ventilator</b> ERV and HRV qualify. Equipment should be equipped with freeze/frost protection. Minimum CFM 40. Limit 2.	\$500
<b>ENERGY STAR® Whole-Home Dehumidifier</b> ENERGY STAR qualified. Portable units not eligible.	\$350
<b>Efficient Circulation Pump</b> Must be ECM/permanent magnet motor. For hydronic heating systems only.	\$200
<b>Electric Panel Upgrade</b> Replacing main service panel or adding sub-panel. If replacing main service panel, minimum 200 amp required. Must be tied to another qualifying electric measure (see application for list of measures). New construction not eligible. Limit 1.	\$500
<b>Battery Backup System</b> Whole home battery backup system. System must be capable of two-way communication with the utility. Electric only. Gas/propane generators not eligible. Must be hardwired - portable batteries and power stations not eligible. Limit 1.	\$1,000

**For installations January 1, 2025 - December 31, 2025.**

**Visit the website for application forms, installation requirements, and complete rebate details.**
